

APPARATUS FOR PULLING PATIENT UP IN BED

ABSTRACT OF THE DISCLOSURE

- 5 A patient positioning apparatus (30, 330) is provided for use with a patient-support device (20, 320). The patient positioning apparatus (30, 330) is used to pull a sheet (32, 332) on the patient-support device (20, 320) while a patient is lying on the sheet (32, 332) to position the patient in a desired location on the patient-support device (20, 320).
